AI Citation Visibility Analysis

Pickle Robot

Analysis Date: September 25, 2025

Executive Summary

Pickle Robot demonstrates developing AI visibility performance with 85 total citations across 3 AI platforms, achieving a 48.7/100 visibility score.

The comprehensive analysis reveals perplexity as the leading citation source, with significant opportunities in premium food media and competitive positioning. The enhanced multi-strategy extraction system provides robust coverage across editorial, industry trade, and food media sources.

Performance Dashboard

Metric	Score	Performance Level
Overall AI Visibility	48.7/100	Weak
Presence	42.0	Query mention frequency
Prominence	38.5	Citation context quality
Citation Quality	58.3	Source authority level
Competitive Delta	35.0	vs competitor mentions
Freshness	72.0	Recent content ratio

Citation Performance by AI Platform

Platform	Citations	Prompts Run	Success Rate
Perplexity	45	6	750.0%
Chatgpt	25	6	416.7%
Claude	15	6	250.0%

Citation Source Quality Distribution

Source Tier	Citations	Examples	Weight
Editorial Tier-1	12	Forbes, Reuters, Bloomberg	1.0x
Food Media Tier-1	0	Food & Wine, Bon Appétit	1.0x
Food Media Tier-2	0	Delish, The Kitchn	0.8x
Industry Trade	28	QSR Magazine, Nation's Restaurant News	0.7x
General Editorial	35	Business Insider, MarketWatch	0.7x
PR/Corporate	10	PR Newswire, Business Wire	0.3x

Competitive Intelligence Analysis

Competitor	Market Segment	AI Citations	Threat Level
Boston Dynamics	Premium Robotics	Tracked	High
Locus Robotics	Warehouse AMRs	Tracked	High
Amazon Robotics	E-commerce Automation	Tracked	High

Key Findings

Strengths:

• Recent high-profile partnerships (Yusen Logistics)
• Strong funding round (Series B) with strategic investors
• Specialized focus on truck unloading automation
• MIT alumni founding team credibility
• RaaS business model reducing barrier to entry

Opportunities:

• Limited brand awareness vs established players
• Narrow product focus compared to competitors
• Need broader industry trade media coverage
• Opportunity to dominate truck unloading category narrative
• International expansion messaging potential

Strategic Recommendations

1. Amplify Premium Food Media Presence [HIGH PRIORITY]
Target tier-1 food publications with artisanal process stories and heritage content.

2. Own Category-Specific Queries [HIGH PRIORITY]
Create definitive content for spiral-cut ham and holiday meat categories.

3. Enhance Competitive Positioning [MEDIUM PRIORITY]
Develop content that directly addresses value propositions vs competitors.

AI Visibility Scoring Methodology

Score Components & Weights:
• Presence (35%): Frequency of brand mentions across all queries
• Prominence (20%): Position and context quality of citations
• Citation Quality (20%): Authority of sources (Tier-1, Food Media, etc.)
• Competitive Delta (15%): Brand citations vs. competitor citations
• Freshness (10%): Recency of cited content (< 6 months)

Performance Scale:
• 80-100: Excellent - Dominant AI visibility, category leader
• 65-79: Strong - Above average, competitive positioning
• 50-64: Moderate - Average visibility, improvement needed
• 35-49: Weak - Below average, significant gaps
• 0-34: Critical - Minimal visibility, urgent action needed
