AI Citation Visibility Analysis

Pickle Robot

Analysis Date: September 25, 2025

Executive Summary

Pickle Robot demonstrates strong AI visibility performance with 48 total citations across 3 AI platforms, achieving a 75.2/100 visibility score.

The comprehensive analysis reveals perplexity as the leading citation source, with significant opportunities in premium food media and competitive positioning. The enhanced multi-strategy extraction system provides robust coverage across editorial, industry trade, and food media sources.

Performance Dashboard

Metric	Score	Performance Level
Overall AI Visibility	75.2/100	Strong
Presence	75.0	Query mention frequency
Prominence	75.0	Citation context quality
Citation Quality	70.0	Source authority level
Competitive Delta	100.0	vs competitor mentions
Freshness	50.0	Recent content ratio

Citation Performance by AI Platform

Platform	Citations	Prompts Run	Success Rate
Perplexity	22	2	1100.0%
Chatgpt	16	2	800.0%
Claude	10	2	500.0%

Citation Source Quality Distribution

Source Tier	Citations	Examples	Weight
Editorial Tier-1	4	Forbes, Reuters, Bloomberg	1.0x
Food Media Tier-1	0	Food & Wine, Bon Appétit	1.0x
Food Media Tier-2	0	Delish, The Kitchn	0.8x
Industry Trade	0	QSR Magazine, Nation's Restaurant News	0.7x
General Editorial	41	Business Insider, MarketWatch	0.7x
PR/Corporate	3	PR Newswire, Business Wire	0.3x

Competitive Intelligence Analysis

Competitor	Market Segment	AI Citations	Threat Level
Boston Dynamics	Premium Robotics	Monitored	High
Locus Robotics	Warehouse AMRs	Monitored	High
Amazon Robotics	E-commerce Automation	Monitored	High
GreyOrange	AI-driven Solutions	Monitored	Medium

Key Findings

Strengths:

• Strong coverage in The Robot Report and industry publications
• High-profile partnerships generating news coverage
• Quality citations from Forbes, NPR, Reuters (Tier-1 sources)
• Active presence in venture capital and funding news
• Real production deployments with enterprise customers

Opportunities:

• Expand coverage in logistics and supply chain publications
• Increase thought leadership content around truck unloading automation
• Target warehouse management and material handling media
• Build competitive differentiation narrative vs Boston Dynamics
• Leverage MIT founder credentials for technical thought leadership

Strategic Recommendations

1. Amplify Premium Food Media Presence [HIGH PRIORITY]
Target tier-1 food publications with artisanal process stories and heritage content.

2. Own Category-Specific Queries [HIGH PRIORITY]
Create definitive content for spiral-cut ham and holiday meat categories.

3. Enhance Competitive Positioning [MEDIUM PRIORITY]
Develop content that directly addresses value propositions vs competitors.

AI Visibility Scoring Methodology

Score Components & Weights:
• Presence (35%): Frequency of brand mentions across all queries
• Prominence (20%): Position and context quality of citations
• Citation Quality (20%): Authority of sources (Tier-1, Food Media, etc.)
• Competitive Delta (15%): Brand citations vs. competitor citations
• Freshness (10%): Recency of cited content (< 6 months)

Performance Scale:
• 80-100: Excellent - Dominant AI visibility, category leader
• 65-79: Strong - Above average, competitive positioning
• 50-64: Moderate - Average visibility, improvement needed
• 35-49: Weak - Below average, significant gaps
• 0-34: Critical - Minimal visibility, urgent action needed
